

Akvo is a not-for-profit foundation that develops open source, internet and mobile-based software solutions.

The Handbook on **Data Collection**

- Data is collected using inconsistent methodologies.
- Presence of opportunity (Not Need) to collect data. – data fatigue
- Often, data is usually not shared. Leading to duplication of existing data

Goal of the Handbook

- Funded by the EU
- The handbook highlights needs, actions & best practices one needs to adhere for successful data collection project.
- Knowledge is Akvo's – with our tools/services and in-built capacity, we can support organisations in implementing successful Data related Projects.
- Do you have a mobile data collection project?

Five Stages

Consortiums using the Handbook for their data related projects.

Thank you
