DRINKING WATER FROM ANY SOURCE, ANY TIME, ANYWHERE

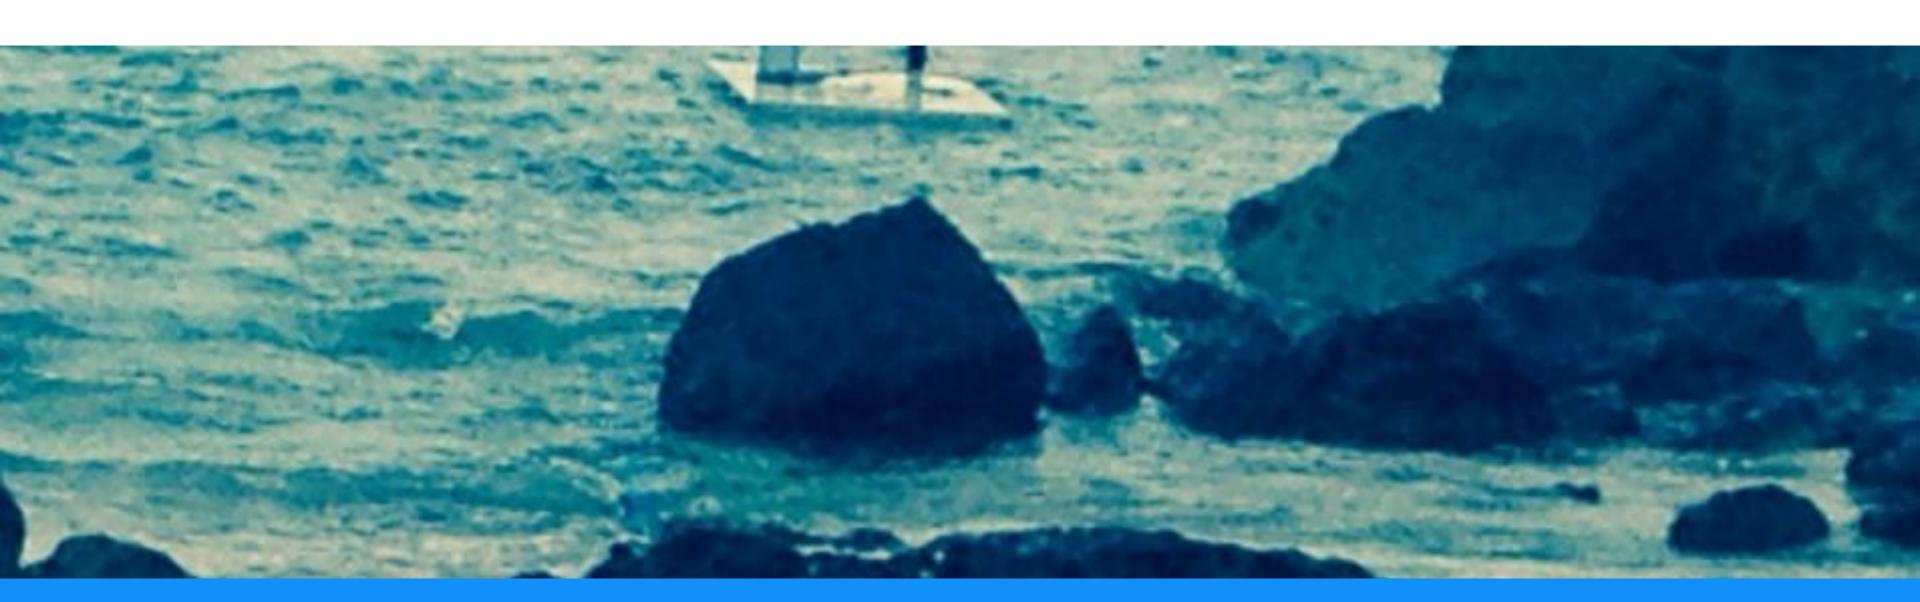

The GALMOBILETM is Independent, integrated Water Purification Vehicle, Designed to produce high-quality drinking water at World Health Organization standards

THE GALMOBILETM PRODUCES DRINKING WATER FROM ANY POSSIBLE WATER SOURCE

Rivers, Lakes and even the Oceans

THE GALMOBILE™ IS MOBILE, SELF- CONTAINED, INDEPENDENT AND AUTOMATIC

The process of purification is based on a combination of technologies (physical and chemical), that can purified any source of water.

The whole process is prefabricated, ready for operation, including the Control System and the Filtration System. The System ensures a controlled flow of quality drinking water.

THE GALMOBILE™ IS SMALL DIMENSION; EASY TO STORE AND SHIP

- Lightweight: 3,395 Lbs. /1,540 Kg (Dry)
- Integrated water storage tank 793 Gallons (3000 Liters)
- The Vehicle can be easily moved (via air, land, or marine transport)

The GALMOBILETM PURIFICATION CAPACITY PER DAY

Sea Water: 23m³ 23,000 liters

Fresh Water: 100m³ 100,000 liters

New Generation – 140m³ 140,000 liters

Emergency Vehicle

ULTIMATE EQUIPMENT FOR FIRST RESPONDERS

Fast Deployment-less than 30 minutes.

Any person with a driver's license is able to operate the Vehicle

EMERGENCY VEHICLE

Military Vehicle

REDUCING LOGISTIC COSTS!

Robust, Simple to operate and use, Fast disengage, Easy to maintenance in deep darkness conditions

MILITARY VEHICLE

Rural Areas Vehicle

IMMEDIATE SOLUTION FOR INFRASTRUCTURE GAP

Easily connected to the local network, Can serve many small communities, Remoted controlled and monitored via cellular and satellite communication

The New Generation Weighing less and produce more

GALMOBILE SUPPLYING CLEAN AND SAFE DRINKING WATER
