MOTIVATION

Key points

- Market for Organic fertilizer
- Available Raw material (80% organic waste)
- Low usage of fertilizer at **2kg/ha** as opposed to **50kg/ha**, annually
- Need to control of the spread coffee wilt (Disease)-**Heat composting(70-80)**
- Need for clean & bioenergy:
Biogas & briquettes

Garbage

Benefits Biofertilizer Production

- 80% of organic waste reduced in municipalities
- Reduction of methane emission into the atmosphere
- Waste to fertilizer- improved agriculture-sustainable livelihood
- Leachate treated for access to water for irrigation(WaSH)

Need For Audience

Strategic Waste
waste management
clients and partners
for sustainable
enviroment &
Agriculture

QUESTION:

Are you looking to
reduce & reuse your
organic waste
sustainably??

DANISH ROOTZONE TECHNOLOGY

Thank You!

A close-up photograph of a fountain pen nib, likely a Montblaster Meisterstück, as it writes the word 'Thank' in cursive on a light blue surface. The pen has a black barrel and a silver-colored nib. The background is a soft, out-of-focus blue.
