

MOBI-WATER

Monitor Your Water, Anytime, Anywhere

**Using Real-Time Water Monitoring to
Improve Water Availability in
Kibera, Nairobi.**

What's the problem?

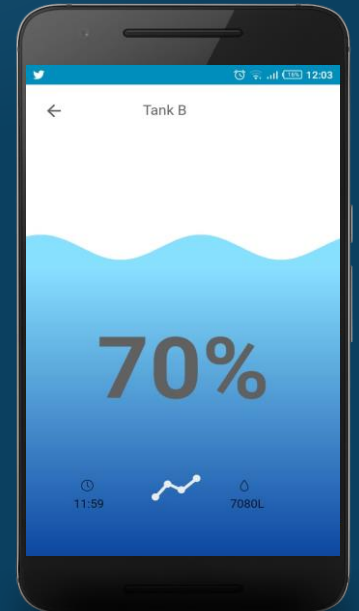

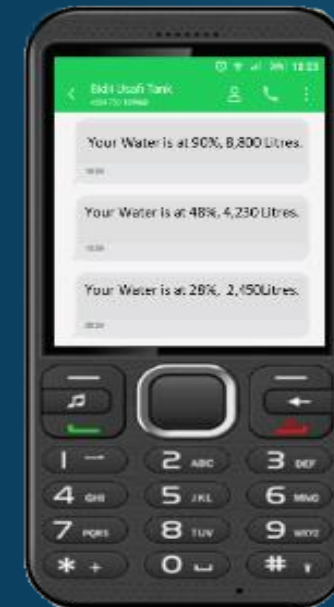

- ❖ Shortages and Inconsistent Water Supply.
- ❖ Lack of Data/Information on Water Points.
- ❖ Lack of affordable Monitoring Solutions for Communal Water Points.

Our Approach: - Mobi-Water

1. Sensor installed on water tank.
2. Water level uploaded via GPRS or SMS.
3. Water Point owner uses App/SMS to monitor available water.

Achievements

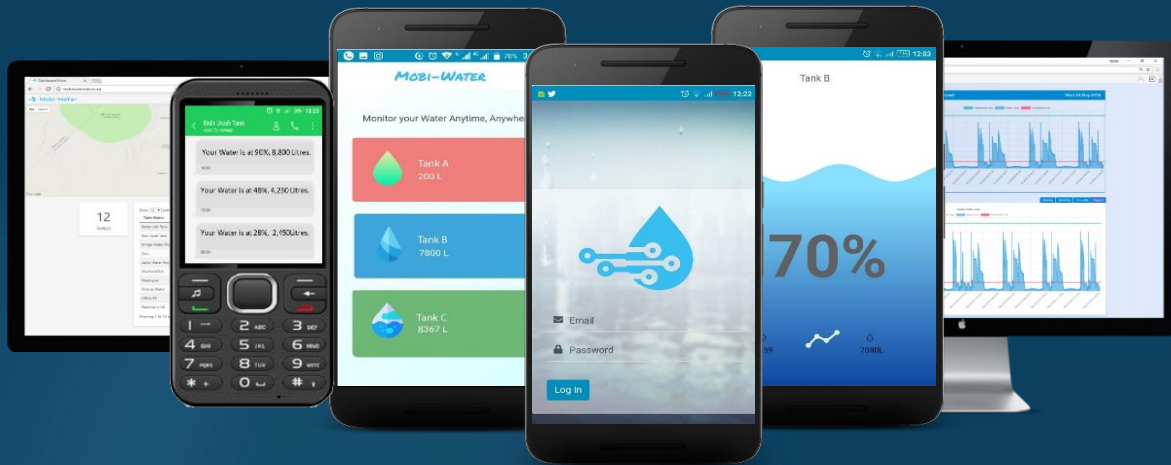

- ❖ 30-45% Increased Water availability.
- ❖ Increased Accountability.
- ❖ 85% Repayment Rate for the Mobi-Water System.

**We're looking for Local Organizations to work with to
expand to other locations!**
